# How to measure

**Installed in window frame**

**Installed outside the window frame**

1. If there is a window box on the upper part of window. Please measure the width box. Also , measure the actual length of window (pls decrease 0.5-1 cm on width).
2. If blind will be flxed on aluminum window, please measure the width and length from inside of window frame. (pls decrease 0.5-1 cm on width).
3. if there is no window box or table, you can measure the curtain size- window width plus 5-6cm.
